Share Offline Scratch Project
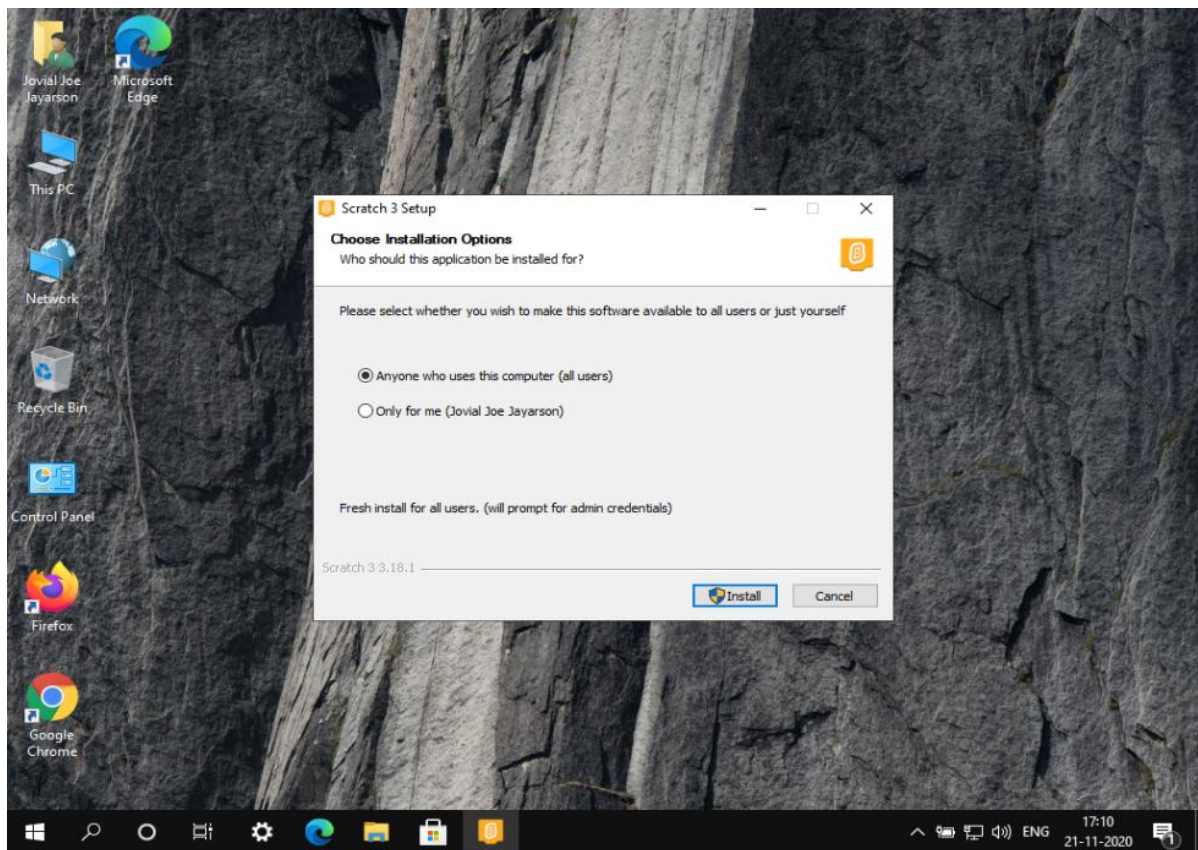

Jovial J J (Mentor)

November 21, 2020
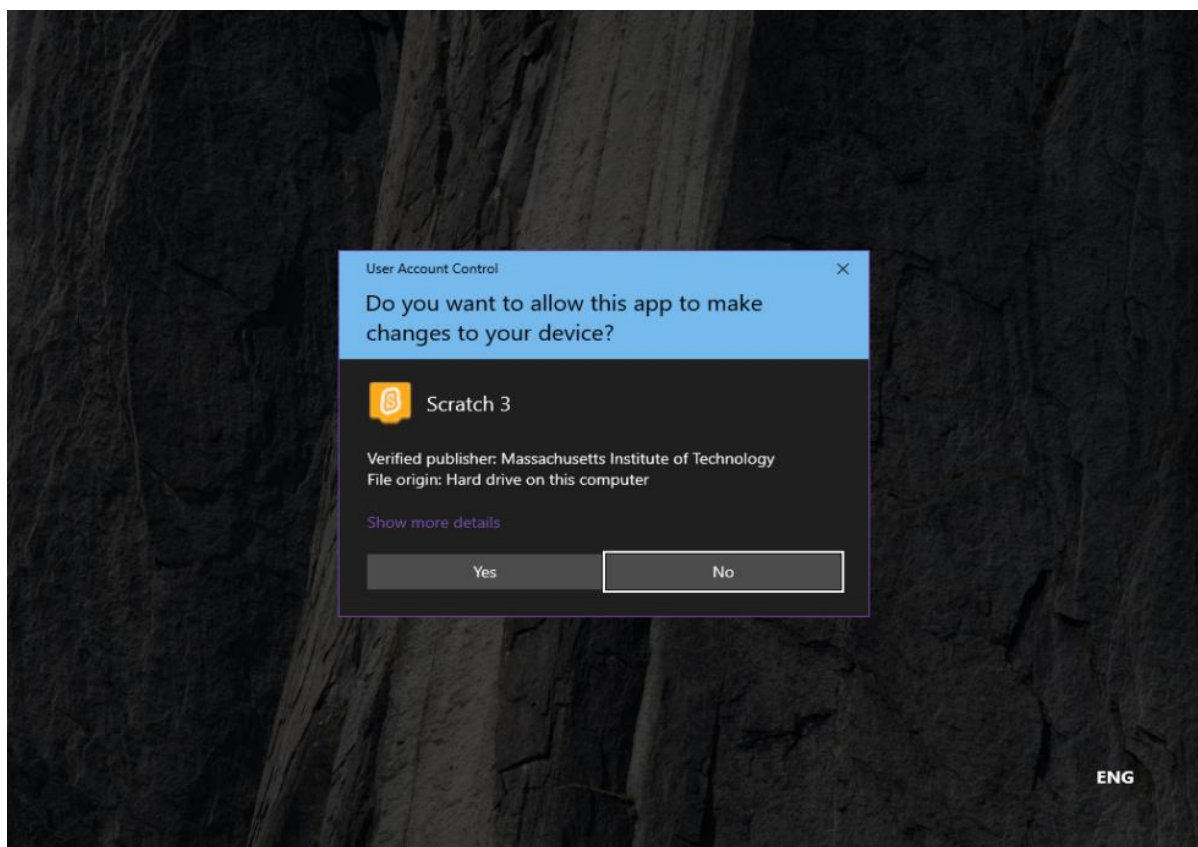

Steps
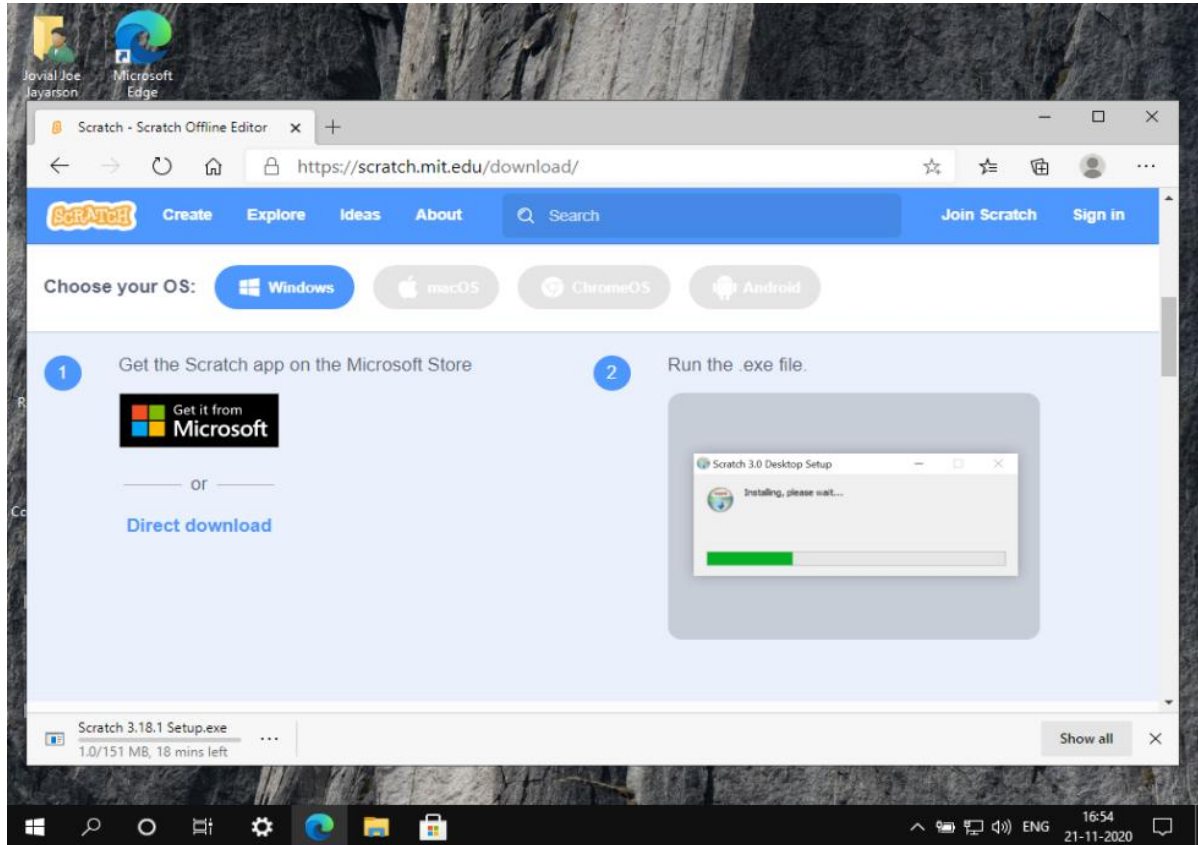

1. Open any browser and goto https://scratch.mit.edu/download.

2. Click on **Direct download**.

3. Wait for the file to download (it's huge!). Once completed click on the Scratch installer.
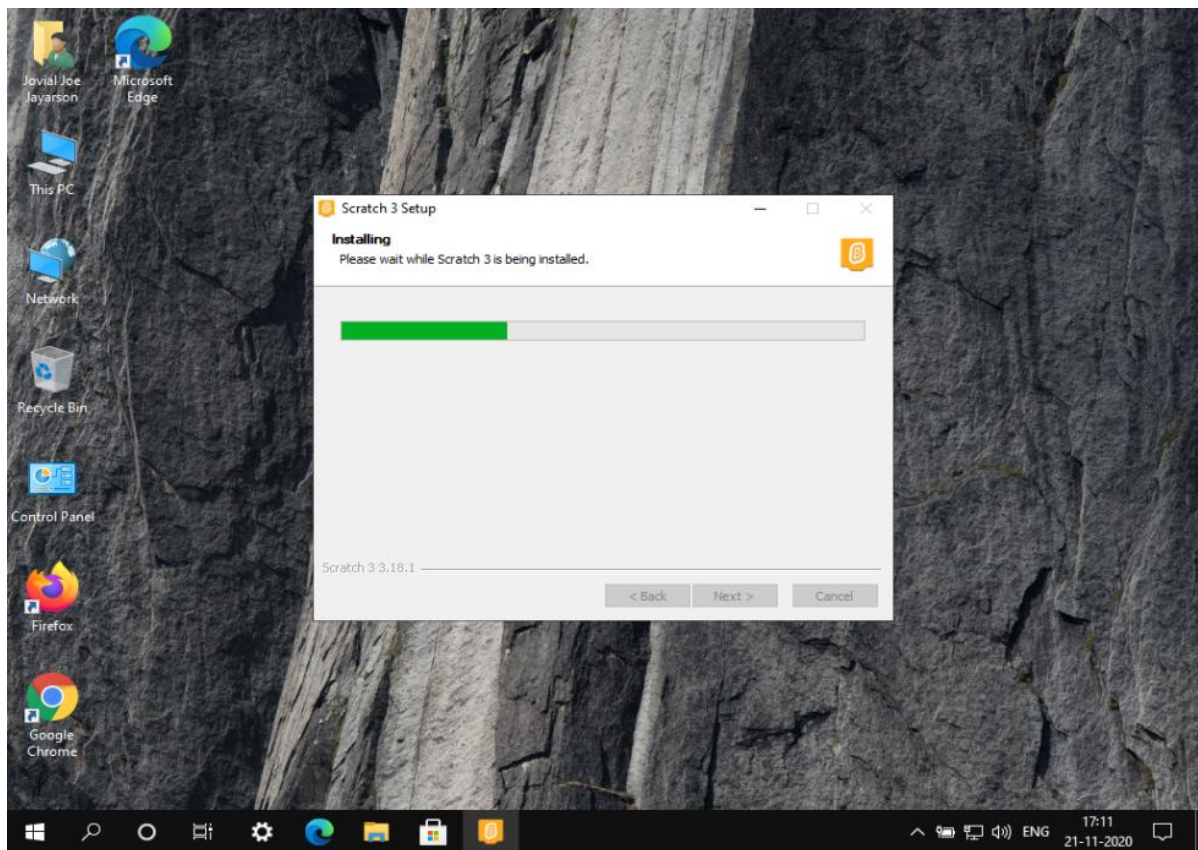

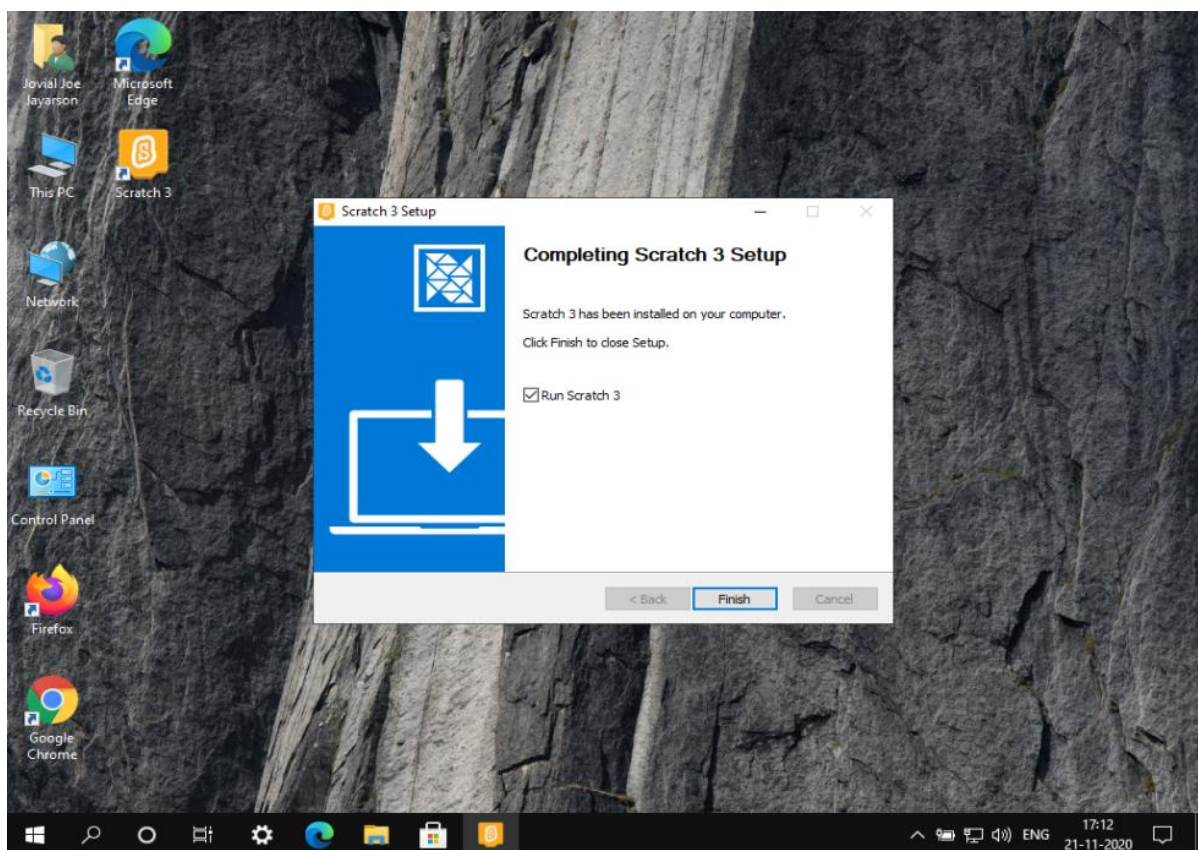

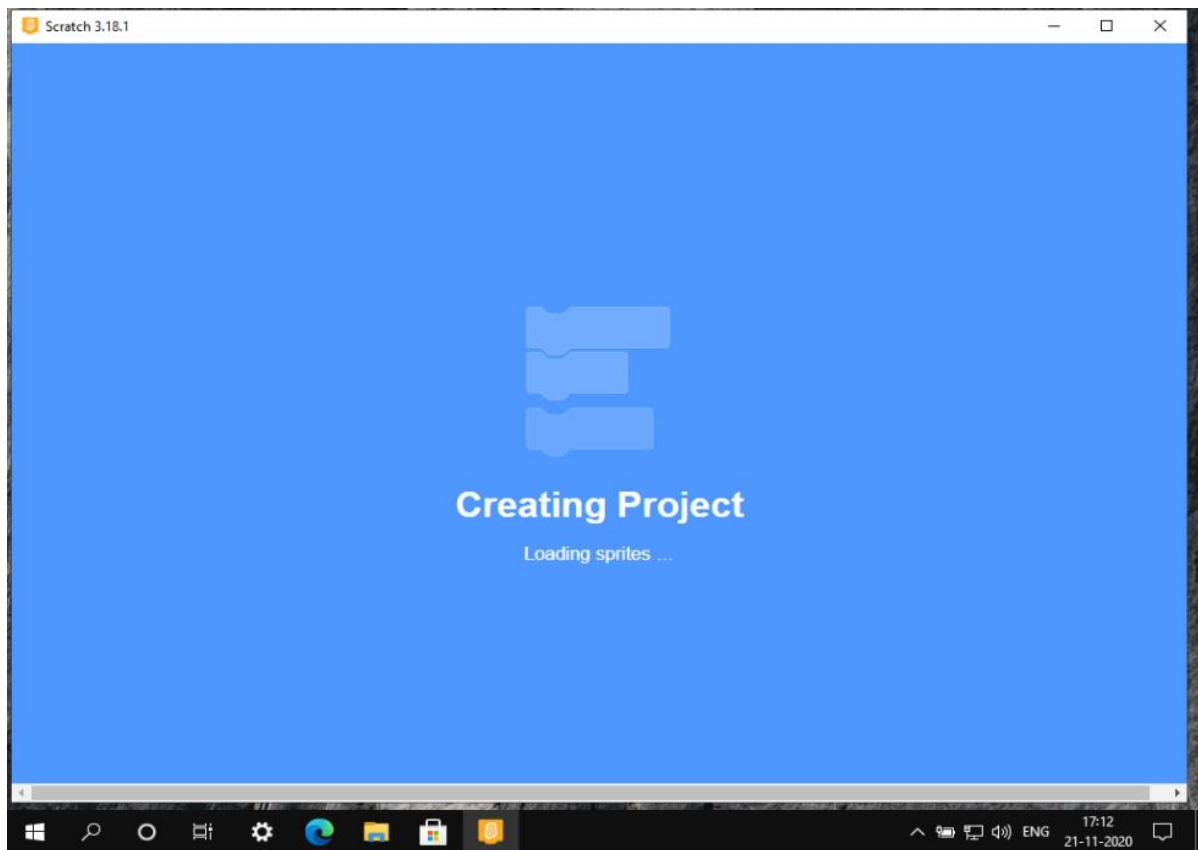

4. Click on **Install**.

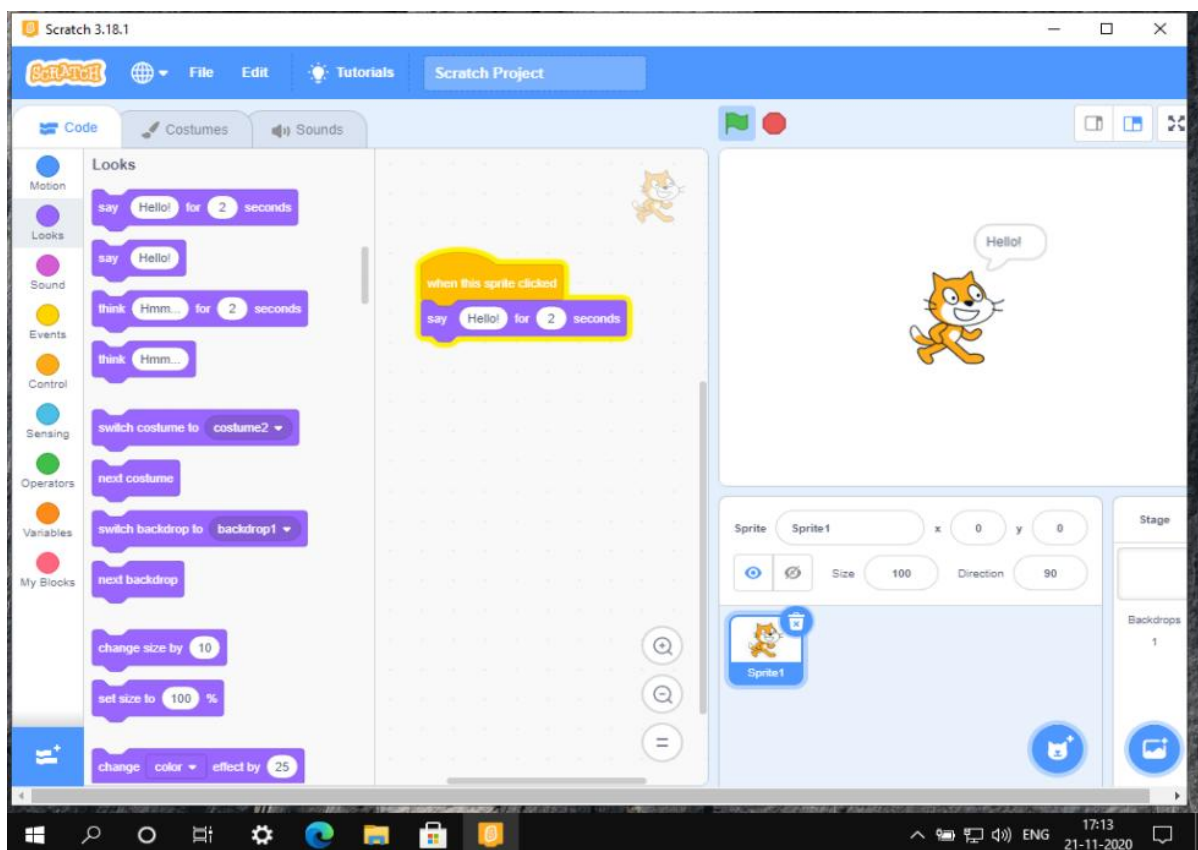

5. Click on **Yes**.
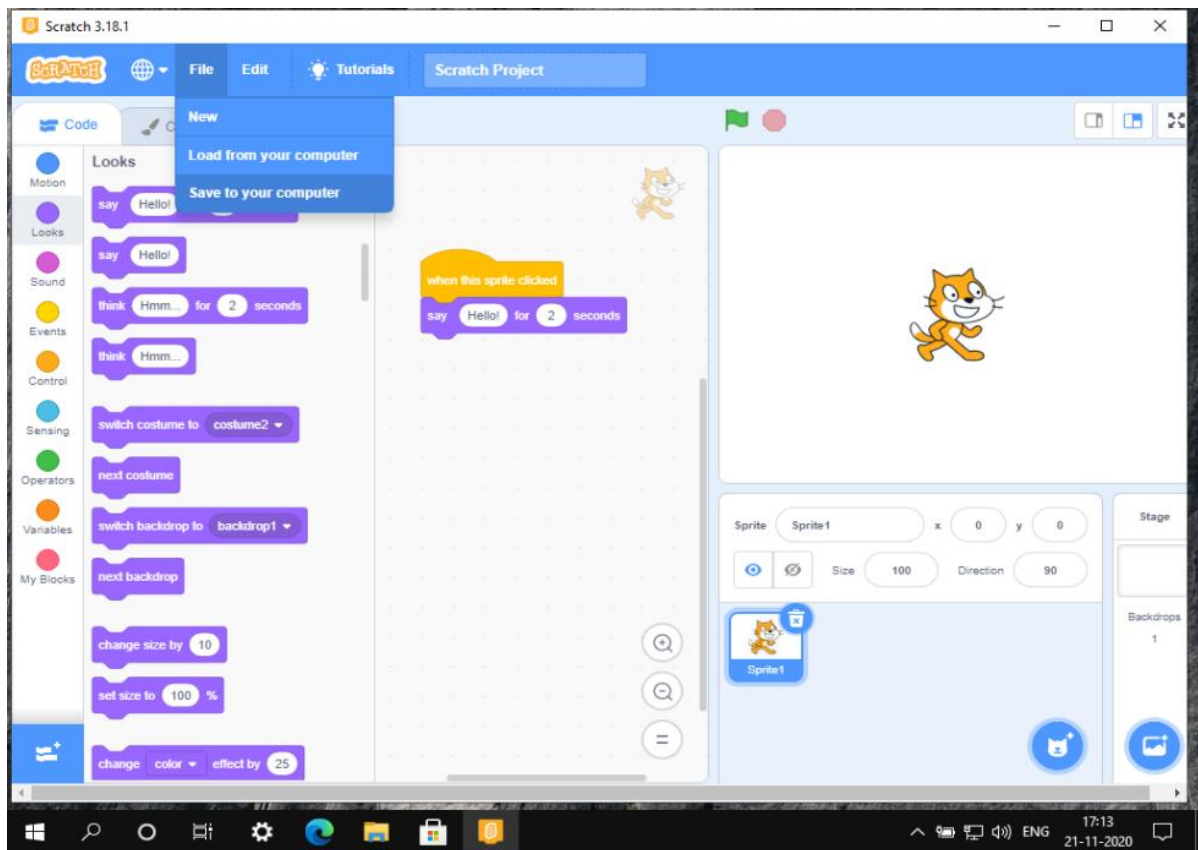

6. Wait for the program to finish installing.

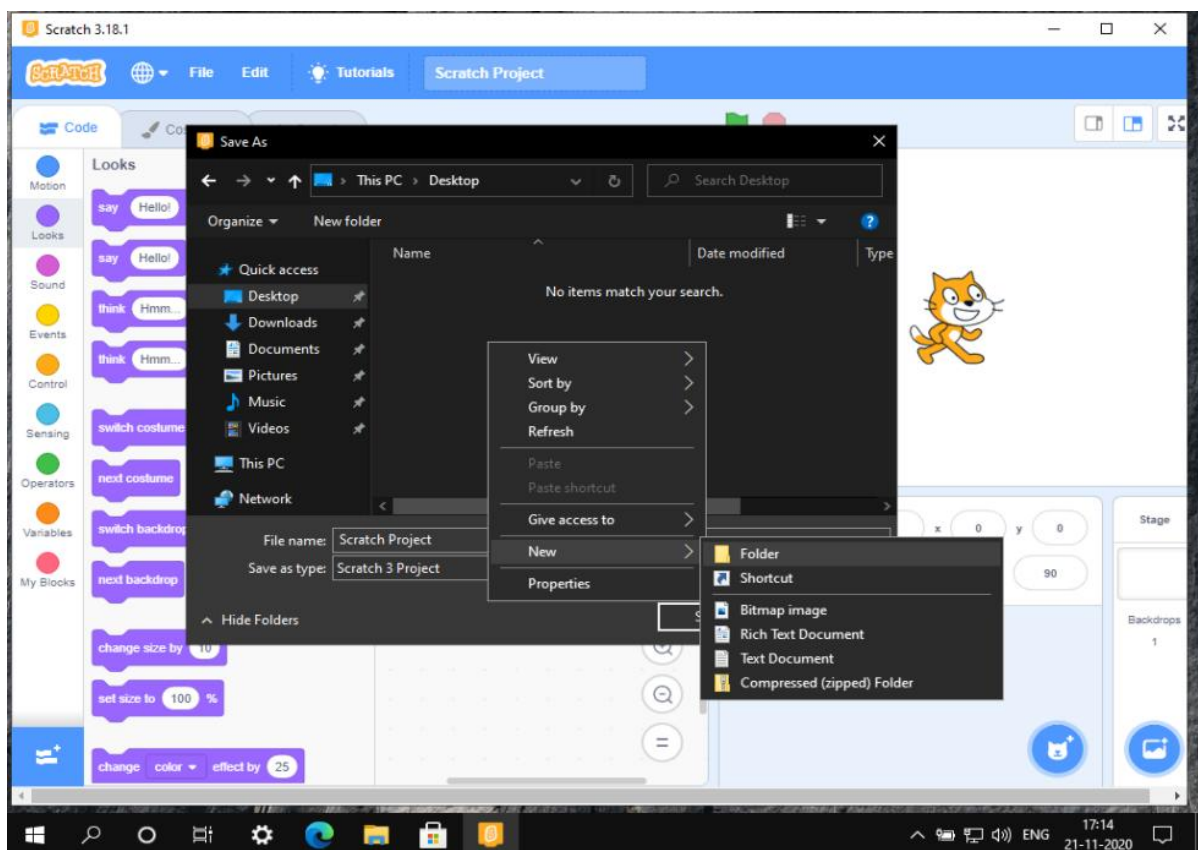

7. Click **Finish**.
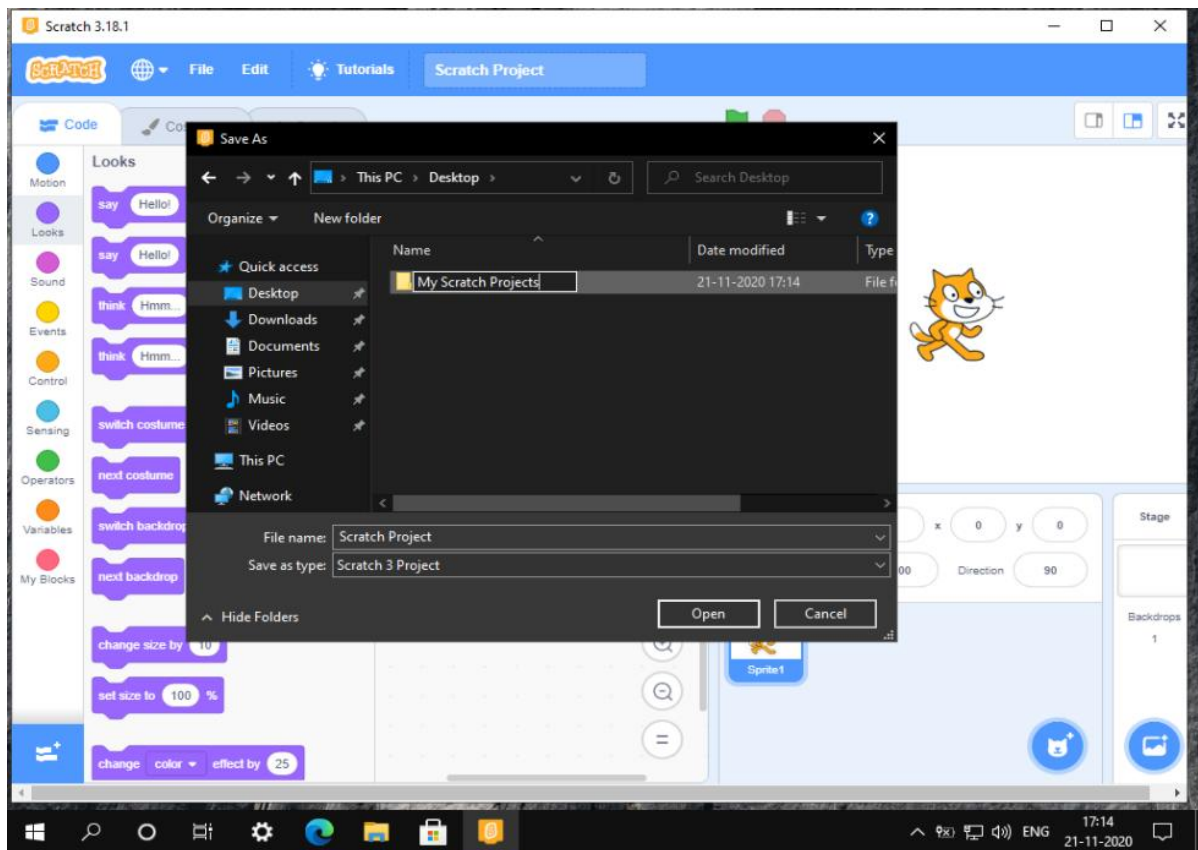

8. Let the Scratch application load.

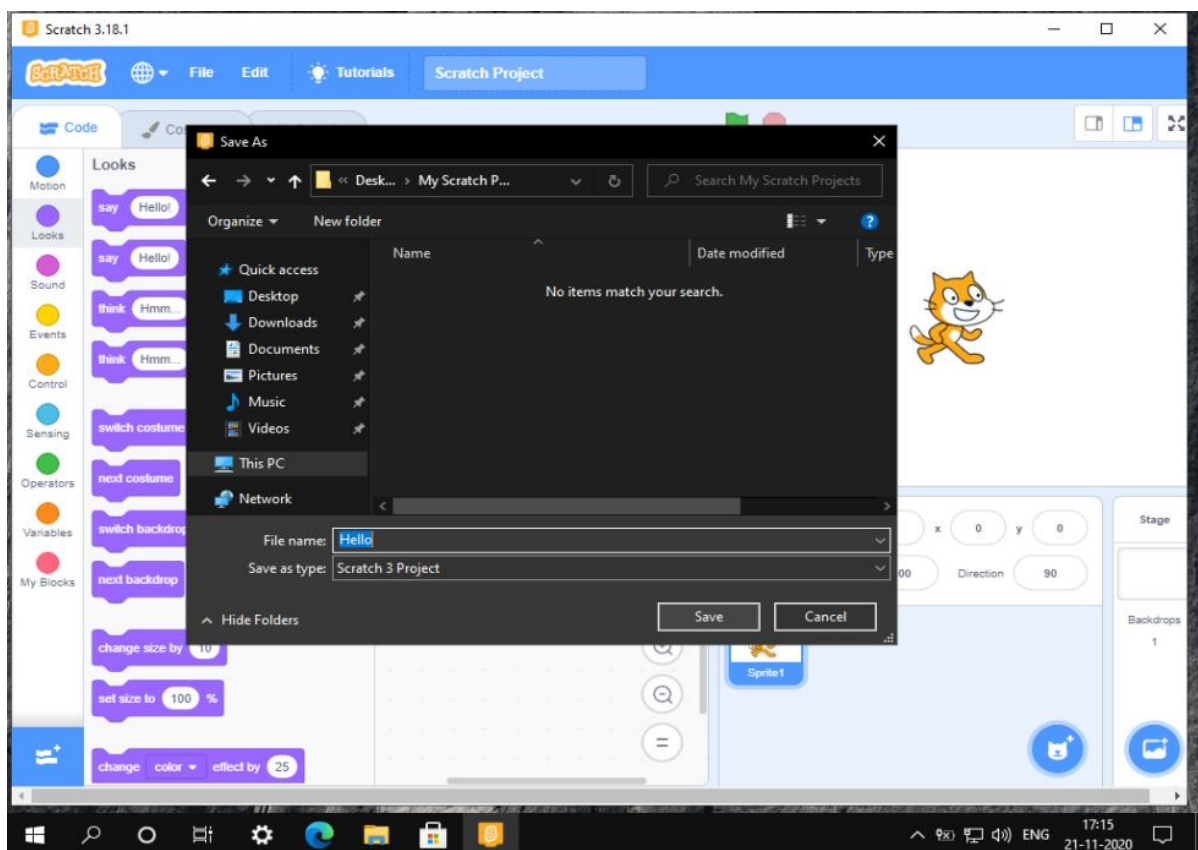

9. Work on your project.

10. Click on **File** then click **Save to your computer**.

11. Create a folder and name it *My Scratch Projects*. Remember the location of the folder.

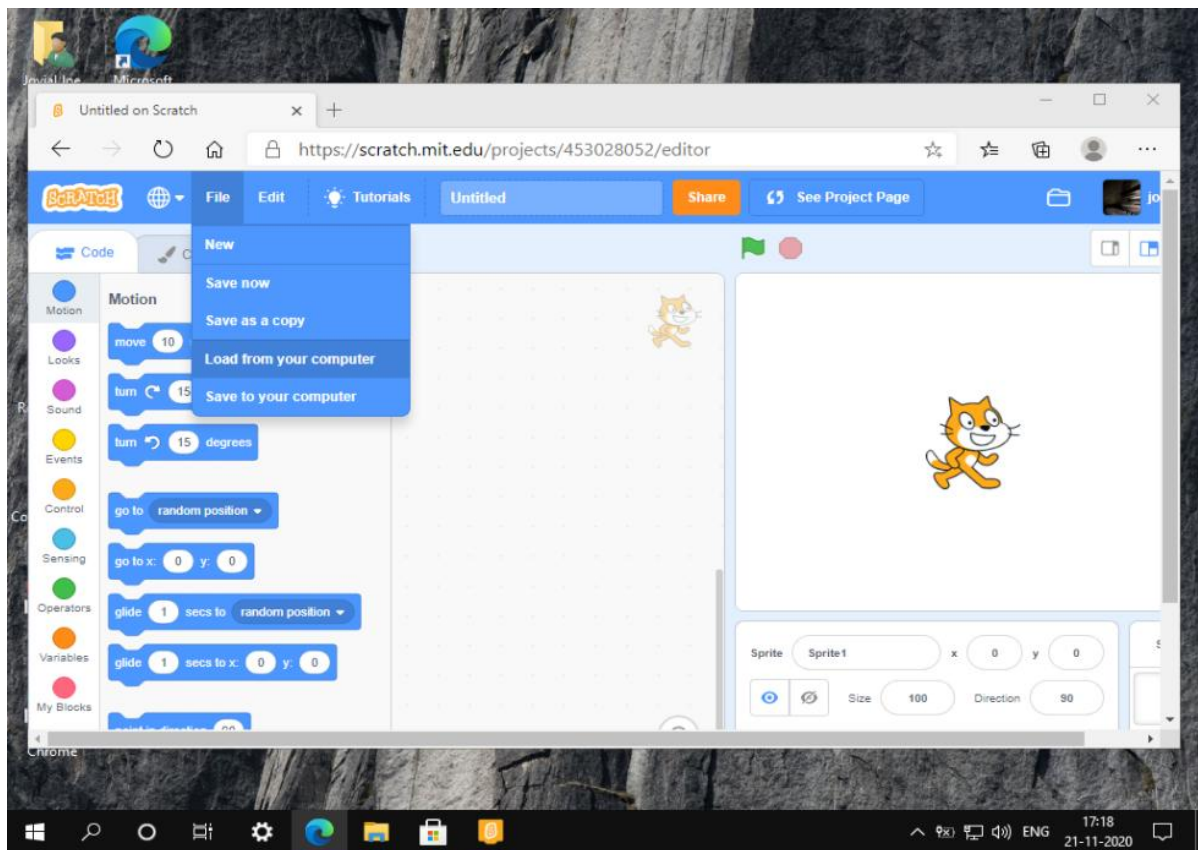

12. Name the file to suit your project.

13. Open browser head onto: https://scratch.mit.edu/.

14. Click **Sign in**. Enter your *username* and *password*. Click the white **Sign in** button.

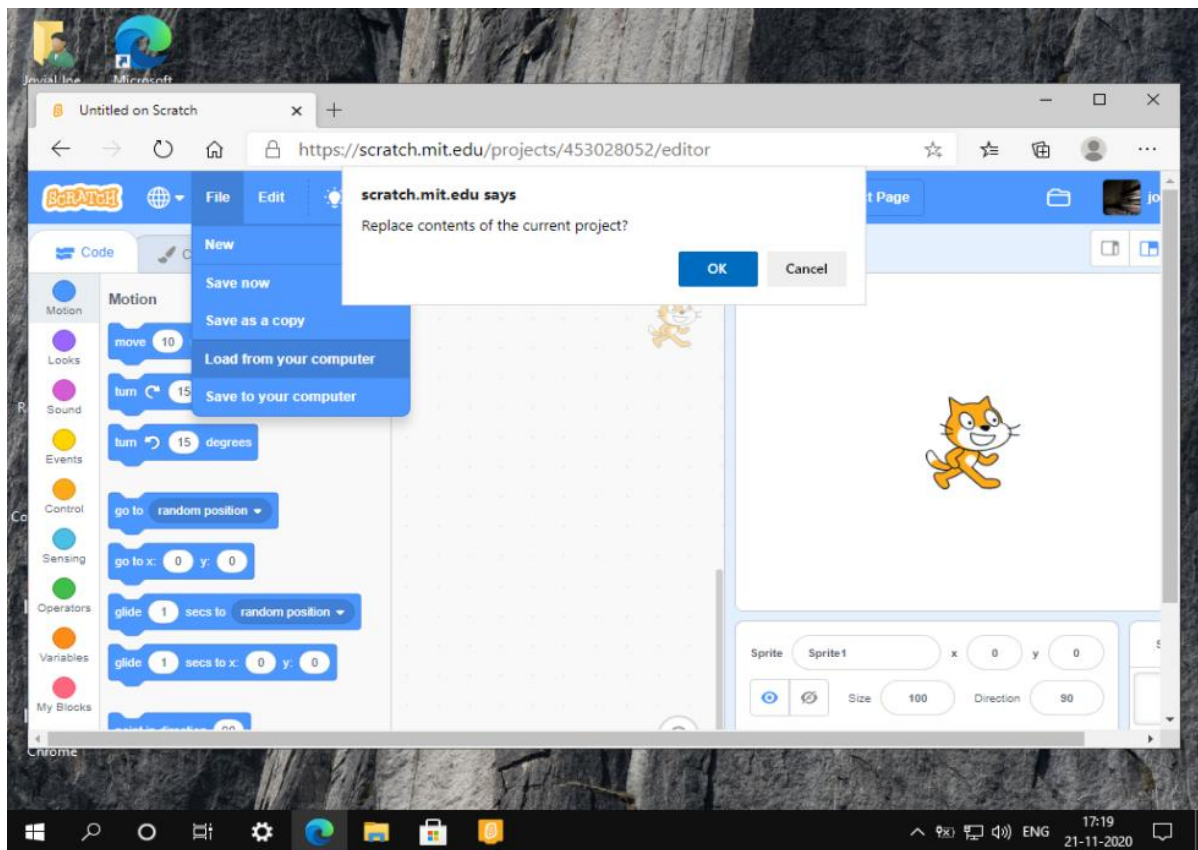

15. Once your logged in, click on **Create**.

16. After your scratch project loads up, click on **File** and select **Load from your computer** in the drop-down menu.

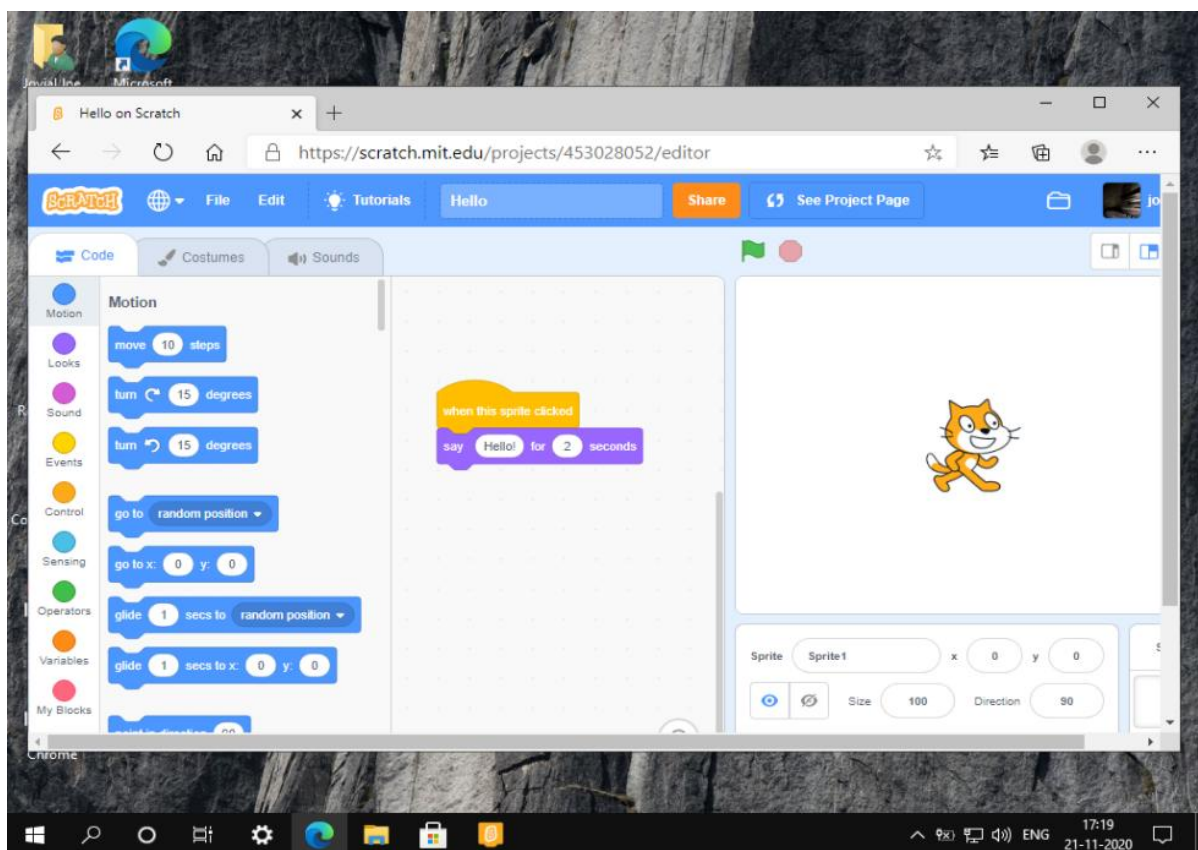

17. Locate your file, and click **Open**.

18. If an alert box pops up, click **Ok**.

19. There you go. You have uploaded your scratch project to your account. Smash the bright orange **Share** button.

20. Bingo! The whole world can see your project.

Tip: *It's recommended to use Scratch right from your browser. It will avoid much hassle.*
